

**Technical Information**

- Case material: Stainless steel and aluminum
- Size: 2" long x 0.8" wide
- Weight; 40 grams with batteries
- Rechargeable battery

- LED - White Light
- Blue halo fixed beam
- Water proof
- Dust proof
- Tactical Barrel
- Blue charging indicator

**Plugs into a standard 12V automotive power / cigarette lighter socket to recharge**

**Operating Instructions**

**1. Installing the Batteries**

Hold the aluminium head firmly in one hand and turn the stainless steel casing in a counter-clockwise direction until fully unscrewed (see figure 1). Move the casing away from the head of the flashlight and this will reveal the battery compartment. Place the batteries into the compartment ensuring that the end marked with plus (+) pole goes in first, pointing towards the rear of the flashlight (see figure 1). With the batteries correctly installed replace the casing and turn it in a clockwise direction until fully tightened. The flashlight is now ready to be charged.

**2. Charging the Flashlight**

This flashlight is designed to be use in automobiles and should be inserted into the 12V power/cigarette lighter socket (see figure 2). The flashlight will glow blue while charging and then go off automatically once fully charged. Full charge will then be maintained so that it is always ready for use.

**3. Operating the Flashlight**

To switch on the flashlight you will need to remove it from the 12V socket and while holding the head of the flashlight firmly in one hand turn the stainless steel casing slowly in a counter-clockwise direction until the light comes on. To switch the flashlight off is simply the reverse; holding the head of the flashlight firmly in one hand turn the stainless steel casing slowly in a clockwise direction until the light goes out and the casing is fully tightened.

**⚠** The light from this flashlight is very powerful and should not be shone directly into anyone's eyes, as this may cause short term blindness. If the beam does shine in your eyes, close them and look away immediately.

BMS LED RECHARGEABLE FLASHLIGHT - Available at BurgerTuning.com

**WARNING**

The light from this LED flashlight is very bright and should not be shined in eyes as this may cause short term blindness.

The symbol shown on the right means that the product is classed as Electrical or Electronic equipment and should not be disposed with other household or commercial waste at the end of its useful life. The Waste of Electrical and Electronic Equipment (WEEE) Directive (2002/96/EC) has been put in place to recycle products using best available recovery and recycling techniques to minimise the impact on the environment, treat any hazardous substances and avoid the increasing landfill.

Product disposal for residential users.

When you have no further use for it, please remove any batteries and dispose of them and the product as per your local authority's recycling processes. For more information please contact your local authority or the retailer where the product was purchased.

Product disposal for business users.

Business users should contact their suppliers and check the terms and conditions of the purchase contract and ensure that this product is not mixed with other commercial waste for disposal.
